Re: LEAN Project/Draft General Permit Comments

Dear Ms. Daha:

The purpose of this letter is to provide your Department with a timeframe for comments from the Department of Public Health (DPH) on the draft *General Permit to Discharge from Subsurface Sewage Disposal Systems Serving Existing Facilities*. As you know, the draft document that you provided to this agency on June 18, 2010 was distributed to our Code Advisory Committee (CAC) on that same day. I have scheduled a CAC meeting for August 19, 2010, and I plan to have DPH comments available by that date.

In your recent email you noted that it is your agency's goal to give public notice in August of this year. Please be aware that it would be most advantageous for all parties involved, if DPH and other stakeholder organizations that are represented on the CAC have an opportunity to submit comments on the draft general permit prior to public notice. This will allow your Department an opportunity to consider stakeholder comments and make any necessary revisions.

Sincerely,

Robert W. Scully
Supervising Sanitary Engineer
Environmental Engineering Program

C: CAC Committee
Suzanne Blancaflor, Chief, Environmental Health Section, DPH
Ellen Blaschinski, Chief, Regulatory Services Branch, DPH
Kim Hudak, DEP
